

W444444444444444444444444444444444444U

DATE: July 31, 2001

COMPREHENSIVE PLAN SPECIFICATIONS: In conformance. This is shown as Low Density Residential in the 1994 County Land Use Plan.

HISTORY: Changed from AA Rural and Public Use to AG Agricultural with the adoption of the 1979 Zoning Update.

SPECIFIC INFORMATION:

UTILITIES: There are no utilities or water districts in the area.

TOPOGRAPHY: Gently rolling, draining to Cardwell Branch to the north.

TRAFFIC ANALYSIS: Southwest 12th Street and West Denton Road are paved county roads.

PUBLIC SERVICE: This is in the Southwest Rural Fire District, the station is located approximately 4 miles from this site. This is in the Lincoln Public School District, served by Beattie elementary, Irving middle and Southeast high schools. Electric service is by Norris Public Power.

REGIONAL ISSUES: Acreage development.

ENVIRONMENTAL CONCERNS: There are no identified environmental or historic resources in or near this application. This land is rated at 6.9 on the land evaluation scale, with 1 being the best and 10 being the worst. This is not prime agricultural land. The water report on other subdivisions in the area have generally indicated good quantity and quality.

AESTHETIC CONSIDERATIONS: NA

ALTERNATIVE USES: Pasture and farming uses. Up to 3 dwellings.

ANALYSIS:

1. This request is for a change from AG Agriculture to AGR Agricultural Residential on a 76 acre parcel of land. This could provide up to 25 dwellings.
2. The stated intent is a conventional residential acreage development of 18 three acre lots.
3. This is in conformance with the Comprehensive Plan Land Use Maps.
4. The abutting land to the west and south is currently platted and developed with acreages and has been zoned AGR.

5. Ground water information was not provided. However, water reports on other subdivisions in the area have generally indicated good quality and quantity.

RE: CHANGE OF ZONE FROM 'AG' TO 'AGR'
LOT 1, FOREMAN RIDGE - SE 1/4 OF 21-9-6

Dear Kathleen,

On behalf of the owners, we are requesting a change of zone from 'AG' to 'AGR' on the above mentioned property. The property is currently shown as 'Low Density Residential' in the Lincoln/ Lancaster County Comprehensive Plan. The site is currently surrounded by 'AGR' zoning on the South, West, and Northwest. This proposed Change of Zone is in conformance with the current Comprehensive Plan.

The site is currently being used for agricultural purposes, however, they would like to move forward with a preliminary plat in the near future. We have enclosed a preliminary lot layout with this application.

Please contact me if you have any further questions.

Sincerely,

Brian D. Carstens

SUBJECT: CZ #3333

The Lincoln-Lancaster County Health Department (LLCHD) has reviewed the proposed change of zone number 3333 for possible negative public health impacts. The following items are noted:

The Williams Pipeline(s) virtually trace the eastern boundary of the parcel in question. The LLCHD has concerns regarding residential development near these pipeline(s) and the risk of exposing a residential population to hazardous chemicals. At a minimum, the LLCHD recommends a buffer zone of 300 feet to the nearest residence from this pipeline(s).

It is assumed from the size of the lots on the preliminary drawing of a subdivision of this property that they would be of at least three acres and have their own sewage disposal system and well. There is a conglomeration of soils on this site. There is Sharpsburg Silty Clay Loam, Wymore Silty Clay Loam, Pawnee Clay Loam, Judson Silt Loam, Kennebec Silt Loam, and a very small amount of Burchard Nodaway complex. The Sharpsburg Silty Clay Loam and Wymore Silty Clay Loam may or may not percolate well enough to provide septic systems. The Pawnee Clay Loam will not percolate well enough for septic systems. The Judson Silt Loam will pass. The Kennebec Silt Loam will pass if dry, but it is a soil that is frequently flooded and has a high groundwater level and should not be built upon or have a sewage system installed upon it. A large part of proposed lot 6 is in this soil as is a part of lot 5. The Burchard-Nodaway Complex is a stream bed and can have nothing built on it. The LLCHD would require that sewage lagoons could not be prohibited by covenant in this proposed subdivision.

Assuming a well would serve each property, there appears to be an adequate amount of groundwater in this area. There is some problems with nitrate levels in the groundwater in low lying areas close to this site. Only test wells could indicate if nitrate levels are a problem in this area.
